PROJECTS

SaaS Vendor Health Monitoring Pipeline | SQL, PySpark, AWS, Databricks, Power BI

- Developed a resilient serverless ingestion pipeline using **AWS Lambda** and **EventBridge** to poll 6 third-party status APIs every 10 minutes, incorporating per-vendor failure isolation, and least-privilege IAM security controls.
- Designed a Databricks **Medallion Architecture** via Unity Catalog and **Auto Loader**, applying **window functions** across 5 Silver tables to isolate true status transitions and minimize noise.
- Engineered a Gold layer **star schema** (7 fact tables, 2 dimensions) to calculate uptime and incident duration differentiating planned maintenance from outages and connected it to **Power BI** via a Databricks SQL Warehouse.

Apex Global Sports Data Warehousing | T-SQL, SSMS, Power BI, Excel

- Built a full medallion-architecture data warehouse in **SQL Server Management Studio**, integrating disparate CRM and ERP CSV sources for a sports retailer through automated bulk-load and transformation **stored procedures**.
- Cleaned and **standardized** messy source data in the Silver layer: deduplication, null handling, date validation, and business-rule derivation (e.g., recalculating sales from quantity x price, normalizing gender/country codes) with full **data-quality test scripts**.
- Modeled a **star schema** in the Gold layer (dim_customers, dim_products, fact_sales) as **SQL views** with surrogate keys, exposing analysis-ready data for customer behavior, product performance, and sales trend reporting

EXPERIENCE

eClerx Services Pvt Ltd

Nov. 2024 – Jul. 2026

Analyst

Airoli, Navi Mumbai

- Developed and executed SQL data validation scripts to clean, deduplicate, and standardize **6,000+** lead records, systematically resolving null values, schema inconsistencies, and formatting errors; delivered sanitized datasets to cross-functional teams and built custom reports, driving **\$800K+** in revenue pipeline.
- Engineered data pipelines in Excel using **VLOOKUP, Pivot Tables, and Conditional Formatting** to automate cleaning, transformation, and reporting across large datasets, ensuring **95% reduction in data discrepancies** through rigorous validation and reconciliation

SKILLS

Programming: SQL, PySpark, Python, Bash

Technical Skills: Databricks, AWS (S3, IAM, Lambda), Git, Power , DAX, MS Excel, Data Pipelines, Data Modeling, Medallion Architecture, Data Profiling, Query Optimization

EDUCATION

SIES College of Arts Science and Commerce

Aug. 2022 – Oct. 2024

Master of Science in Information Technology

Nerul, Navi Mumbai

CERTIFICATIONS

- Databricks Certified Data Engineer Associate
- Accenture Data Analytics and Visualization Job Simulation
- HP Agile Project Management Certification
